

Christmas Stockings Tutorial

The finished size is 17.5" long from top of folded cuff to toe, 21.5" unfolded, and 6.5" wide.

For each stocking you'll need:

2 outside pieces

2 lining pieces

2 cuff pieces

1 6" piece of ribbon
applique (optional)

For a Quilted Look,
Create your Fabric design
then use the stocking
template to cut out of it.

This is actually a great project for fat quarters! It takes 1 FQ for each stocking, and 1 produces 2 cuffs.

First, iron the cuff pieces in half.

Now right sides together, sew the cuff piece to the front stocking piece.

Then sew the same lining piece to the other side of the cuff with right sides together.

You'll have something that looks like this:

Press your seams to the middle.

Repeat with the back pieces.

Lay the front and back together with right sides facing each other, lining up your cuff pieces.

Take the 6" of ribbon and make it into a loop.

Place it between your lining layers on the BACK side (heel side) of the stocking with the loop on the inside. Line it up right where the lining meets the cuff. Pin in place.

Pin the stocking pieces together.

To sew them together, I started in the "sole" of the lining. I sew the lining together at 3/8" seam allowance and when I get to the cuff, I gradually move it over to 1/4" seam allowance. I do this to make sure the lining fits perfectly inside the stocking when put together and it doesn't lump or bulge.

Leave a hole a few inches wide along the bottom of the lining to turn the stocking through. To make sure your curves lay flat, you need to clip them. I cheat and use pinking shears. Turn the stocking through your hole and iron everything flat.

Sew the hole in the lining closed, stuff the lining into the outer pieces, and you're done!!
