

## **Quick Curve Rulers by Linda Heatherley**

**The** *Quick Curve Rulers* by *Sew Kind of Wonderful* company has patterns with traditional and innovative modern designs. The technique using these rulers means that curves can be sewn without pins because the blocks are squared up after the seam is sewn.

In order to sew the blocks quickly, I use only one of the sewing machine's feed dogs. I move the needle to the left (two clicks on a Bernina) so that the  $\frac{1}{4}$ " seam allowance is on the left side of the right feed dog (the right feed dog does not touch the fabric). The rulers and patterns can be found in quilt shops or ordered on-line.
