

Creating with Curves and Color.

This is a design class for the beginner and/or the advanced quilter. We will explore two fun techniques: *Double Vision*, which simply is the layering of Shapes and Color for richly complex designs. And *Fractured Quilts*, which means the fracturing and/or *cutting into strips*, resulting in curvy and colorful pieces of art. At the start of this class we will discuss the construction of both procedures. Each procedure will have multiple design choices from the very simple to the more complex. Depending on your ability and preference. Come and join me for days filled with creativity and design your own one-of-a-kind quilt.
