

Light box and Light Pad Information

Supply List: Light box or light pad with a minimum of 9 in. x 12 in. lighted area.

Why do I need a lightbox?

Crayon: The black and white artwork must be traced onto the fabric.

Applique: Applique pieces must be traced onto the Steam A Seam 2. We use a Bear Thread applique pressing sheet to build the units for the project, this is done on the lightbox.
